Illinois State Food Service Sanitation Code

Subpart A: General Provisions
Section 750.10 Definitions
Page 8

“Category I facility” means a food establishment that presents a high relative risk of causing foodborne illness based on the large number of food handling operations typically implicated in foodborne outbreaks and/or the type of population served by the facility. A certified food service sanitation manager must be present in Category I facilities at all times when potentially hazardous foods are prepared and handled. Category I facilities include those where the following operations occur:

- cooling of potentially hazardous foods
- potentially hazardous foods are held hot and/or cold for more than 12 hours
- reheating cooked and cooled potentially hazardous foods
- preparing potentially hazardous foods for off-premises serving
- preparing complex foods, handling raw ingredients extensively, and/or having hand contact with ready-to-eat foods
- performing vacuum packaging and/or other forms of reduced-oxygen packaging
- serving a population comprised mostly of immuno-compromised individuals such as the elderly, children under the age of 4, and pregnant women
“Category II facility” means a food establishment that presents a medium relative risk of causing foodborne illness based upon few or no food handling operations typically implicated in foodborne illness outbreaks. *Category II facilities must employ a full-time certified food service sanitation manager at all times.* Category II facilities include those where the following operations occur:

- hot and/or cold foods are held for no more than 12 hours and are restricted to same day service
- minimal assembly of food containing raw ingredients
- foods requiring complex foods are obtained from an approved food processing plant, licensed high risk food service establishment, or retail food stores
